Solution

BRANDING SOLUTION OVERVIEW

Printing

Almost all of our products can be supplied with your logo printed on them. Our printing is done directly at the factory. This means the highest quality for you, because the print is covered with a layer of clear lacquer and this permanently protects the stick.

Data preload to a USB Stick

We would be happy to directly transfer customized data to your USB stick at the factory. This can be just about any file format, e.g. PDF, PowerPoint or HTML. In addition, Autorun files (e.g. logo overlaying) are also possible. We can also generate read-only areas for you.

Laser Engraving

Many of our USB sticks are made of metal, chrome or aluminium. Your company logo can be laser engraved on the surface of these USB sticks. This is very robust and most suitable if the USB stick is on a key chain.

Custom shape of item (Metal, ABS, PVC material)

We have the experience and resources to develop a custom project according to your specifications. The projects could be developed based on various materials: ABS hard plastic, silicon, PVC, metal, etc. We are willing to work with you through every step (designing, hand-made sample, moulding, production) to ensure your product is developed to meet your requirements.

Leather Embossing

All of our leather bound USB sticks are available with embossing. Blind embossing is "stamped" on the leather with heat - this process allows your logo to appear with sharp edges. Thus, we are able to emboss "www.addresses" and smaller lettering on the leather.

Custom shape of packaging

We can according to customer request do different kinds of packaging in different material as packaging parts show.

USB Sticks with Pantone® printing

We can custom colour USB sticks according to the Pantone® colour code. You can now have a USB stick that matches your logo and/or corporate design. Check our overview to see which USB sticks can be coloured according to the Pantone® colour code.
